The whole garden in the palm of your hand

 **GARDENA**[®]

Product range

GARDENA

My garden.
My passion.

We are not alone in our passion for gardening — we share our inspiration and ideas for the garden and home with gardening enthusiasts in over 80 countries.

Our products offer these important benefits:

1. Quality

We provide a full range of products. That means that you receive everything you need to tend to your garden and keep it looking great. GARDENA products are renowned for their extremely high quality and reliability. Our entire chain of production is subject to strict test cycles and quality guidelines. **Many of our products are made in Germany.**

2. Innovation/technology

GARDENA develops products that make gardening as easy and efficient as possible. Our products feature a system concept. This principle is reflected in many product ranges: It makes handling simple, expands your options and conserves resources. Our product range is constantly developed and improved using the latest technology.

3. Ergonomics/comfort

GARDENA values the ergonomics of its products very highly. All GARDENA products should be comfortable to hold and should make gardening easier.

4. Service

The expert GARDENA Service team is there for you if your product needs repair or maintenance. Find out more at www.gardena.com

GARDENA

How it all began

Innovative and Systematic

The company is based in Ulm, Germany and was founded in 1961 by merchants Werner Kress and Eberhard Kastner, who initially started by selling French garden tools. The final breakthrough came in 1968 with the launch of the Original GARDENA System. This was followed by additional clever systems during the next years.

Thanks to the brand's excellent innovative drive, great quality and fantastic value, it took just a few years for GARDENA to become well-known worldwide as a manufacturer of intelligent products and systems for garden irrigation and upkeep. This makes gardening tasks quicker and easier, giving you more time to dedicate your passion to the good things in life.

1968

Click system

Original GARDENA System

The idea of a modular system is brilliant and timeless: Simply combine a tap connector, hose, hose connector and watering accessory, click into place and that's it. Want to change the accessory? It takes just one click. Using our orange fittings always been a pleasure!

1985–1990

Turn on the water

Irrigation technology

Back in 1985, we launched the water computer that controls an irrigation system. As early as 1990, our sprinkler and **Micro-Drip systems** united everything you need for intelligent and fully automated garden irrigation.

1990

One for all

accu System V12

One rechargeable battery for many tools. Previously operated by the accu system V12, today the system uses lithium-ion batteries. Now your modular tools purr like a cat, such as hedge clippers, trimmers, lawn edgers or even impact drills.

1973

Cordless freedom

Accu Standard 4 and 6

In the 70s, a true liberation – today, a matter of course. In 1973, we brought out our innovative, cordless edging shears. These were followed by the Accu Trio (pictured above). The Accu 6 is considered a design classic and is on display at the Museum of Modern Art in New York.

1975

Great results

Secateurs and pruning loppers

In 1975, a full range of secateurs and pruning loppers was introduced for the first time. Since then, we have provided safety and excellent results thanks to innovative developments for large and small hands, thick and thin branches, great heights and sharp blades.

1976

A stylish handle

GARDENA combisystem

Free choice of accessories causes a sensation. Broom? Rake? Cultivator? Large or small tool? Wood, aluminium or telescopic handle? So many possibilities! Simply combine the handle with the tool of your choice and rotate to connect them. Done.

1978

Pumps for all uses

Garden pumps

Pumping away! We have always had a love of water. We have been developing impressive, high-pressure irrigation and drainage solutions and solutions for domestic water supplies since 1978. Our goal: Top-quality pumps with a kick.

2007

Round the corner

AquaContour automatic

Gardens come in a variety of sizes and shapes with round, angled, varied and imaginative lawns and beds. And how do you water a garden like that? With AquaContour! A great invention. It reaches every nook and cranny.

2013

Mowing without moving

Robotic lawnmower smart system

How smart is that? The robotic lawnmower sets to work, and you can sit back and relax. And you can still enjoy a manicured lawn. Thanks to the experience of Husqvarna, GARDENA is a pioneer in robotic lawnmowers. Our robotic lawnmowers mow and mow and keep on mowing.

2016

Smart gardening

smart system

More independence for gardening enthusiasts? This app makes it possible. Use your smartphone, tablet or PC to organise irrigation and control a robotic lawnmower while you are travelling. More freedom for gardening enthusiasts.

2017

city gardening

city gardening

If more and more people implement their ideas for city gardening, their houses will be more beautiful, they will have healthier lives and the world will be greener. That's why we offer products for balconies, terraces and small urban gardens.

GARDENA city gardening

A dark grey basket filled with various gardening tools, including a pair of blue-handled scissors, a pair of blue-handled shears, and a pair of blue-handled trowels, resting on a wooden surface.

Six of the many advantages of city gardening

If you don't have a garden, then don't worry. City gardening has arrived. Enjoy flowers, vegetables and herbs even in the smallest of spaces, such as on your balcony or terrace or in a small urban garden. More and more people are moving to the city and are taking nature with them under the motto of "From grey to green".

1. Health and wellbeing

Fresh herbs and vegetables

Great taste, and great for you too.

Gardening and relaxation

Exercise, fresh air, stress relief and fun.

Flowers

Keep your body and soul beautiful.

2. Sustainability

Experience and knowledge

Pass on plant info and garden tips.

For a healthy future.

Diversity

Preserving the valuable things.

Actively protecting the environment

Create more green spaces and help bees to do their job.

Escape the grey with a green vacation

Treat every day as a holiday.

Everything you need for city gardening

Sow, plant, weed, water, harvest, try
See page 12

Tips and ideas for city gardening:
www.gardena.com

3. Community & vibrancy

Shape your home

Make your life as beautiful and colourful as a garden.

Working together

Revitalise urban garden culture.

A multicultural balcony

Italian basil, Indian coriander, Turkish mint and local parsley...

Come together and celebrate

Eat and drink among the flowers and herbs.

4. Go back to your roots

Make marmalade

Pure fruit indulgence straight from balcony to bread.

Green oasis

Secret retreat... island break... childhood memory... design space...

Mobile flowerbeds

When you move, take your garden with you.

5. Be individual

Self-sufficiency

From your balcony to your table.

Creative cooking

Cook fresher and better.

6. Do it yourself

Green "garden room"

Use plants to create a unique look.

Mine!

Learn new things. Just do it! And have fun.

Green. Fresh. You.

Gardening gives you breathing space.

GARDENA city gardening

Gardening is everywhere – including in the heart of the city.

The trend is unmissable; more and more people are being drawn to urban living and they refuse to do without their own, private green oasis there. After all, living centrally and having your own green space isn't mutually exclusive, because more and more plants are blossoming, sprouting and flourishing on balconies, garden terraces and roof terraces. The motto is: Out with the grey, in with the green!

GARDENA city gardening lets you unleash your passion for gardens, however small the space. Looking for the green in the city? Look no further!
GARDENA city gardening makes the city more green, more colourful and well-being!
Right outside your own door.

on the balcony

in the Garden

in the backyard

on the terraces

on the roof terraces

Gardening on your balcony

Everything you need, together in one place

GARDENA city gardening Balcony Box

Keep everything together, ready for use. Grab what you need from the practical Balcony Box. A space-saving solution for tidying away your four most important gardening tools, safely protected against all kinds of weather. This practical box also has space for other accessories, such as gloves and florist wire. Another smart feature is the lid, which can be used as a dustpan.

Get creative with flowers and herbs

1. oil made from flowers and herbs

A feast for the eyes and a taste explosion. For you. Perhaps for your friends, too.

- High-quality base oil
- Flowers/herbs
- A suitable bottle
- You can also season further with ingredients like garlic, onions, chillies or lemons

For 750 ml of base oil, add 3–4 stems of high-quality herbs, washed and dried, or add the whole leaves to the bottle. Fill with oil. The herbs must be completely covered by oil. Close the bottle firmly until it is air-tight. Store for at least four weeks in a cool, dark place. The oil has a shelf life of several months or up to half a year.

Moving and loosening earth

Trowel and hand fork

The perfect size
tailored to the areas of use

Aluminium die-cast trowel and hand fork
Robust and light as a feather

Ergonomically designed handle
sits perfectly in your hand

Soft components
so you can work comfortably

Keep everything to hand when cutting and sweeping

Secateurs and hand brush

Additional soft components
for a better hold

A comfortable cut
Gripping distance can be adjusted to two hand sizes (S-M)

Special blades
for flowers and herbs for optimal cutting results

Ergonomically designed handle
sits perfectly in your hand

Optimal cleaning results
thanks to tight-fitting bristles

Integrated mount

for easy storage, no need for any additional parts

7.5 m spiral hose

Winds back up after use for compact storage

Equipped with Original GARDENA System Parts

Ready to use

2. Watering tips for your balcony

How often?

Better to water infrequently but generously. That allows the water to get to the roots, where the plant needs it, without evaporating on the way. At the height of summer and when the weather is really hot, container plants often need to be watered twice a day.

When?

The best time to water is early in the morning. Watering in the evening is okay as well, but cooler temperatures overnight can mean that the damp earth attracts fungal diseases.

How?

If you don't want to water quite so often, then plant large, deep pots or larger planters with several plants. This is because more soil soaks up more water.

Individual plants in small pots need to be watered more frequently. Be careful: Some flowers or plants, especially roses and tomatoes, should be watered at the roots, not from above, otherwise they can easily get fungal diseases or the tomatoes can split.

Which plants?

Plants with hard, strong or fleshy leaves make the easiest balcony plants, as they are used to dry conditions. They store water in their foliage and that means you don't need to water them all the time. Examples such as geraniums, sedums, oleanders and rosemary are all quite happy on a balcony.

The convenient watering solution

GARDENA city gardening 10 m Terrace Hose Box

FOR MORE
INFORMATION,
SEE PAGE

132

The GARDENA city gardening 10 m Hose Box is the complete package; you can use it to water your plants or clean the terrace: the hose is already equipped with Original GARDENA System Parts and can be compactly stored for ultimate practicality!

Compact storage

3. Treat your plants, then treat

Discover your new favourite drink.
The fresh alternative to water.

For hot summer days:

- 1 litre of water
- The juice of 1 lemon
- Place 1 bunch of fresh herbs (e.g. mint, lemon balm, woodruff) in water

Leave everything in the refrigerator overnight
Remove the herbs the next day
Dilute with mineral water if necessary
For those who like it sweet, add honey.

GARDENA smart system

Your garden is in your hands – anywhere and at any time.
App-controlled and only available from GARDENA.

Do you want the convenience of managing and tending to your garden while on the move? Keep everything in check and under control. Your garden will become your favourite place to sit back and relax, with time-consuming tasks such as mowing the lawn and watering all going on around you in perfect coordination. Always have up-to-date information on your plants and manage your smart system tools using the app as and when you need to, even when you are travelling. And when you return home – all the gardening tasks are complete.

The smart system is not only one step ahead in terms of technology - its look is also a highlight:
We received the Product Design Award in 2016

reddot design award
winner 2016

GARDENA smart system

The future of the modern garden has begun.

For more:

-  Comfort – Sit back, relax and enjoy your free time.
-  Freedom – To spend more time in your own garden.
-  Control – Always have a perfectly manicured garden.

Central networking

The smart gateway can be placed in an unobtrusive location in the home and uses the user's router to establish a connection to the Internet. It forms the heart of the smart system and is responsible for wireless communication between all GARDENA smart system tools in use in the garden.

The free GARDENA smart app for iOS and Android always keeps you informed about the state of the plants in your garden. Wherever you may be, the app offers a convenient way to keep an eye on your garden, control your smart system devices and adjust features such as watering times and mowing times to suit your needs.

40 V* System

The smart Battery seamlessly integrates GARDENA 40 V* products equipped with an interchangeable battery – such as lawnmowers – into the smart system. The app displays key data at all times – such as the charge level or the remaining operating time - and issues warnings in the event of extreme heat or cold. State-of-the-art lithium-ion battery technology ensures safety, a long service life and real power.

Flexible application

With its powerful pump capacity, the new smart Pressure Pump is suitable for use as an automatic water supply system in the home as well as for mobile use when watering the garden. All pump functions are easy to operate using the app. Even individual watering times can be programmed for automatic garden watering.

Communication is key

Using the smart Water Control system, watering times can be conveniently programmed directly on the user's smartphone and coordinated with the mowing times of the smart SILENO as required. This system is ideal as an automatic irrigation solution for watering balconies, terraces, flower gardens and kitchen gardens using the Micro-Drip system or for watering lawns using a sprinkler system.

Complete control

The smart sensor sends important information concerning factors such as soil moisture, light intensity and ambient temperature directly to the app. These values form the basis for a needs-oriented approach to watering that uses as little water as possible.

Maximum convenience

The smart SILENO and SILENO+ robotic lawnmowers deliver top-class mowing results and can manage complex lawns of up to 1300 m² in size with gradients of up to 35% on their own and with ease. Mowing times can be programmed using the smart app and coordinated with the watering times of the smart Water Control system.

*The maximum output voltage without load is 40V, the nominal voltage 36V.

Set

smart system Set

Never mow the lawn or water again! Fully automated – always a perfectly manicured lawn. Needs-based and efficient irrigation of plants.

Contents: smart Gateway, smart SILENO, smart Sensor, smart Water Control

GARDENA smart system App

Gardening on the move

Your way in to the GARDENA smart system for more freedom, convenience and inspiration in the garden. With regular updates and function enhancements. Free for smartphones and tablet PCs.

GARDENA smart system App

Using the free GARDENA smart app for iOS and Android, you can monitor and manage your entire garden with a single finger. Mowing the lawn and watering has never been so convenient. The app features an intuitive user interface. Mowing the lawn is therefore child's play and watering the plants happens when they need it; both tasks can be coordinated or controlled remotely whenever you want. Here are just a few of the most important functions:

Getting started

It is so simple to get the GARDENA smart system up and running – the app will automatically guide you using step-by-step instructions. The system can be installed on any tool, and all it takes are a few simple steps.

My Garden

The intuitive GARDENA smart app shows an overview of all measurements taken by the smart sensor. Feel safe in the knowledge that your plants are in good hands. At the same time, you can see an overview of all your smart tools and their statuses, and take control at any time if necessary.

Schedules

The days of the week and times can be programmed separately for each piece of equipment. Your schedules can be easily copied and edited, and all scheduled times are displayed in an overview. You can also set priorities for the products such as stopping the robotic lawnmower just before the sprinkler system starts.

smart mowing

Robotic lawnmower smart SILENO/SILENO+

Fully automated, reliable, stripe-free and even mowing of lawns up to 1300 m², even of large and complex areas.

- **Cutting capacity** – 1000 m² (SILENO) or 1300 m² (SILENO+)
- **Gradients** – of up to 35 % and uneven areas of lawn
- **Works quietly** – 60 dB(A), so it will not bother you or your neighbours
- **Reliable and durable** – Modern lithium-ion battery technology
- **EasyPassage** – Narrow passages are detected and handled automatically – without extra programming
- **SensorControl** – Mowing frequency is automatically adjusted to grass growth (SILENO+)
- **Safely connected** – Stable, wireless network with secure wireless technology

smart irrigation

smart Sensor

Delivers key information regarding irrigation controller settings via the GARDENA smart app, thereby helping you to create a beautiful garden.

- **Always connected** – Powerful aerial guarantees wireless connection to the Gateway – even in large gardens
- **Reliable** – Works in various textures of soil
- **The local weather station for plants** – Measures temperature and light intensity
- **Digital root** – Measures soil moisture on the spot at the plant's root

smart Water Pump

New!

smart Pressure Pump

Use the smart Pressure Pump to supply your home and garden with water via an app.

- **Multi-control via App** – Full control of all pump functions.
- **Individually programmable** – For a time controlled, automatic garden watering
- **Small quantities program** – Easy to use even with minimal water requirements
- **Powerful** – 1300 W, 5000 l/h, 5,0 bar, 2 outlets, integrated fine-meshed filter
- **Diagnostic system** – Diagnostic system with text information in detail about potential faults how to correct them

smart Water Control

Irrigation times can be flexibly set and adjusted as required at any time using the GARDENA smart app.

- **Always connected** – Powerful aerial guarantees wireless connection to the Gateway – even in large gardens
- **Be in-the-know** – LEDs indicate status on request
- **Reliable** – Thanks to proven GARDENA valve technology
- **Direct control** – Use this button if you need water straight away
- **Frost alarm** – You will be warned before it becomes too cold to operate the Water Control system

smart accu information

New!

smart Battery

The smart Battery seamlessly integrates GARDENA 40 V* products equipped with an interchangeable battery - such as lawnmowers - into the smart system.

- **Battery level and remaining runtime** — so you always know how much power is left
- **Hot and cold warning** — protects your battery for a longer service life
- **Versatile and independent** — suitable for all GARDENA 40-V products* with a system battery
- **High performance** — 40-V batteries* provide 2.6 Ah (BLi-40/100) or 4.2 (BLi-40/160) for a long runtime
- **Reliable and long-lasting** — state-of-the-art lithium-ion battery technology

Irrigation

My garden. My free time.

Your garden is a place of rest and relaxation. You need the correct irrigation to ensure that your plants and lawn remain green and healthy. Find ideal irrigation and water supply solutions. We offer efficient solutions for virtually any garden. And thanks to the automatic irrigation systems, you can also enjoy your garden without having to spend hours watering it.

Original GARDENA System

The New Generation of a Million Times over Proven Classic

For over 45 years, the Original GARDENA System has stood for easy watering in the garden. One click – and the connection from the water tap to the hose and the watering accessory is absolutely tight. The new generation of the Original GARDENA System features an improved fit at the connection between hose and coupler and improved handling for many functions. And all system parts fit together perfectly – just like before.

Perceived Quality Made Visible

Modern design, premium materials, clear product classification.

The new Original GARDENA System – even more attractive and convenient

The new and modern style is synonymous with GARDENA and makes the system even more attractive and convenient.

Even higher quality

Premium materials and precise workmanship ensure excellent quality of the Original GARDENA System.

Even tighter connection

Thanks to the specially shaped sleeve nut (patent pending), the system fittings hold hoses particularly securely, even those made by manufacturers other than GARDENA.

Even more grip

The particularly ergonomically shaped system parts with soft components lie ideally in the hand and ensure a good grip even with wet hands.

Overview of Selected Original GARDENA System Elements

Connection options for the tap

Angled Tap Connector

Prevents kinking and twisting of the hose on the tap due to rotating and swivelling connector.

Four Channel Water Distributor

For connection to the tap. For the operation of up to 4 watering accessories. Adjustable and lockable water flow.

Twin-Tap Connector

For connection to the tap. For the operation of up to 2 watering accessories. Adjustable and lockable water flow.

Adapter for Indoor Taps

For connecting the GARDENA System to an indoor tap (e.g. kitchen and bath).

New colour scheme to easily locate parts:

- 1 Light hose lead – connection to the water tap
- 2 Dark hose end – dark water stop + accessories

1 Tap lead

Tap Connector

For connection to the tap. Easy, problem-free handling without tools.

1 Hose lead

Hose Connector

A simple pull quickly releases the connection to the hose.

Hose connections

Coupling

To extend the hose. Also for transitions from 19 mm (3/4") to 13 mm (1/2") hoses.

2 Hose end

Water Stop

Disconnect = automatic water stop.
Connect = water flow.
Without a walk to the tap.

GARDENA Hoses

With Power Grip for optimum grip.

Garden hoses have to withstand heavy-duty use for many years. They are used, uncoiled and coiled, dragged back and forth and moved across small, large, regularly or irregularly shaped gardens. The requirements on garden hoses differ. GARDENA offers the right hose for every garden owner and every need. All are free of phthalates and heavy metals and resistant to UV. The Power Grip profile guarantees secure connection of the hose connector and hose. Thanks to new technology, these interlock like toothed wheels. The typical GARDENA design ensures cohesion between all elements – both from a technological and a visual point of view – and acts as a seal of quality.

High-quality spiral mesh textile

Extremely pressure-resistant and keeps its shape

- Flexible and easy to handle
- Does not tie itself in knots or twist
- Uncoils smoothly

135

TIPS AND TRICKS

Length of garden hose

For longer hose lengths (from 20 - 30 m), it is beneficial to choose a hose with a larger diameter (e.g. 3/4"/19 mm) to achieve the maximum pressure. Moreover, all GARDENA hoses are available in various lengths and diameters.

GARDENA Hose Storage

Now even more convenient:
The solution for simple garden irrigation.

GARDENA Hose Trolley

With a hose trolley, the hose is always tidily rolled-up and ready to use. No more troublesome pulling and carrying of the hose through the garden. Select your model. GARDENA Hose Trolley is available in classic to comfort models.

GARDENA Classic Hose Reels

With a GARDENA Hose Reel, your hose will always be ready to use and carefully stored. Optionally, you may also select a wall-mounted hose box with practical bracket.

GARDENA Wall-Mounted Hose Boxes

Convenient and safe:
Automatic hose roll-up with spring mechanism.

Also available as battery-operated version with automatic hose retraction.

GARDENA Hose Trolley

No more strenuous watering

GARDENA Nozzles, Sprayers and Spray Lances

There is the right tool for every application in the garden with the new GARDENA Classic Cleaning Nozzle, Watering Sprayer and Spray Lance. The new watering accessories deliver:

- Frost resistance for sustainable quality
- Ergonomic on /off trigger with convenient lock
- Convenient, one-handed regulation of water quantity
- Made in Germany

The right model for every application

Sprayers

Ideal for cleaning and fine-mist irrigation

Clean intensive stains - using the hard jet

Nozzles

Ideal for a range of irrigation tasks

Water plants - using the soft spray

Water flowerbeds - using the fanned soft spray

Water delicate plants - using the fine spray mist

Spray Lances

Ideal for a better range and more targeted irrigation

GARDENA Garden Showers

For Refreshing

Shower in the garden as comfortably as in the bathroom. A GARDENA Garden Shower can be easily set up in the garden and provides refreshing enjoyment on hot days.

GARDENA Sprinklers

The right irrigation for every garden- and lawn type.

Whenever small to large areas need to be irrigated, GARDENA Sprinklers fulfil the highest demands. Simply connect to the tap or your pump and you'll irrigate your garden conveniently and without puddles. No more troublesome carrying of watering cans. For every garden- or lawn type, there is the right sprinkler for reliable and even irrigation.

Flexible and compact for small and medium-sized areas

Offers

- 1 **Car Cleaning Set**
Wash brush, running water handle, shampoo
- 2 **Floor Cleaning Set**
Comfort scrubbing brush, running water handle, shampoo
- 3 **Shampoo**
For effective cleaning of painted and plastic surfaces. Biodegradable
- 4 **Shampoo Wax Sticks**
For cleaning paint and plastic surfaces. Biodegradable

DID YOU KNOW...

that you can perform a huge array of tasks using our Cleansystem products? All you need to do is choose the handle and matching connecting device and you are ready to go.

Automatic irrigation with GARDENA

And you can leave your garden on its own.

Irrigating your garden can be so easy when you leave it up to a GARDENA Irrigation System. Once installed, your plants are conveniently supplied with the necessary water quantity while you relax. Irrigate during the day, at night, during your holiday – you conveniently set the time and duration with a GARDENA Watering Control. Lawns, flowers, vegetables and potted plants thrive even better thanks to ideal irrigation, and you have more time to enjoy your garden.

Sustainability

Save up to 70% more water.

Growth

Harvest up to 30% more and enjoy healthier plants.

Time

Spend more time on other areas of your garden as well as on yourself.

Freedom

You can even leave your garden alone, no matter how the weather develops. The watering system activates automatically and regulates itself.

Flexibility

Combine convenient and unique watering solutions for your garden.

1 GARDENA smart system

Mowing the lawn can be exhausting and daily watering a chore, but these are now a thing of the past. The new GARDENA smart system: sit back, relax and enjoy your free time. Easy to install and start with the touch of a finger on the smartphone app. The intelligent garden of today.

More on page 16

2 GARDENA Sprinklersystem

The convenient pop-up irrigation of your garden. Thanks to permanently installed pop-up sprinklers, your lawn will be irrigated where it is needed. Automatic drain valves protect against frost.

More on page 40

3 GARDENA Micro-Drip-System

Irrigation with drip heads. Evaporation is very low and the water is efficiently supplied. For flower and vegetable beds, hedges or shrub rows, in greenhouses or for potted plants on patios.

More on page 42

The right system for any application

4 GARDENA Pipeline

Water – like electricity from the mains. The GARDENA Pipeline is installed below ground and with a hose you withdraw water where you need it.

More on page 44

5 GARDENA Watering Controls

With the GARDENA Watering Controls, you determine when and for how long your garden is to be irrigated. Fully automatic – it couldn't be more convenient.

More on page 45

GARDENA Pumps

Gardena Pumps are the ideal addition to your irrigation system. Simply use water from cisterns, rain water tanks or wells for irrigating your garden.

More on page 48

GARDENA Sprinklersystem

Convenient pop-up lawn irrigation.

With a permanently installed, below-ground GARDENA Sprinklersystem, you'll irrigate your garden conveniently. Depending on the lawn shape, there are various pop-up sprinklers that distribute the water where it is needed. Once their work is finished, they disappear back into the ground. The result is a lushly green, healthy lawn. You can also install your GARDENA Sprinklersystem in your garden. Totally flexible and easy, the traces of installation also disappear after a short time. Thanks to automatic drain valves, the GARDENA Sprinklersystem is frost-proof and a GARDENA Watering Control automatically starts and stops lawn irrigation. Stop watering – and enjoy your garden!

Selected GARDENA Sprinklersystem products

Convenient lawn irrigation through a permanent, below-ground installation gives you more free time and garden enjoyment.

Circular Sprinklers

Circular sprinklers are suited for watering a wide range of surfaces owing to the fact they can be separately combined in a network.

Pop-up Oscillating Sprinklers

For watering square and rectangular areas.

Large-Area Pop-up Sprinklers

Suitable for watering individual lawn shapes.

Connecting point

For the underground supply of water to the GARDENA Sprinklersystem.

Pop-up Sprinkler S 80 (S-Sprinkler)

Recommended for areas up to 150 m².

Turbo-driven Pop-up Sprinkler (T-Sprinkler)

Recommended for areas up to 150 m².

Pop-up Oscillating Sprinkler OS 140

For areas up to 140 m².*

AquaContour automatic

For areas up to 350 m².*

* The calculated coverage is dependent on the operating pressure (bar)! The data for the AquaContour were obtained with 4 bar, for all other pop-up sprinklers with 2 bar operating pressure at the sprinkler.

Frost protection

Winter frost? No problem! The automatic drain valves protect the system against frost.

GARDENA Simple Connection Technology

Install the Sprinklersystem quickly and easily.

With the patented "Quick & Easy" Simple Connection Technology, installing a GARDENA Sprinklersystem isn't difficult at all. And thanks to the many installation elements, you can flexibly modify the system according to your garden.

- Pipe assembly / disassembly through simple turning by 140°
- Impact-resistant, weather- and UV-proof

Patented / patent pending

142

Selected GARDENA sprinkler system products

Complete Set with Large-Area Pop-up Irrigation AquaContour automatic

Complete and ready to connect up for easy and convenient pop-up irrigation of individual lawn areas. Flexible area coverage thanks to variably adjustable ranges.

Up to approx. 350 m² lawn area.

Complete Set with Pop-Up Oscillating Sprinkler OS 140

Complete and ready to connect up set for convenient irrigation of rectangular lawn areas.

Add-on and extendable system. For lawn areas up to 140 m².

TIPS AND TRICKS

What sprinkler combination is suitable for my garden?

Want a preview of your custom sprinkler solution? The My Garden sprinkler system planner is a free online application that allows you to automatically position sprinklers and supply lines. Just click through the page. Your sprinklers and pipes are positioned automatically, while a shopping list is created on request. A schematic display provides a clear overview. The installation guide provides step-by-step instructions on how to easily install the products in your garden.

GARDENA Micro-Drip-System

Carefree and water-saving irrigation.

With a GARDENA Micro-Drip-System, you irrigate all plants outside of the lawn in a targeted and water-saving way. Ornamental- or vegetable plants, outdoor crops, tender shoots in the greenhouse, and balcony or patio plants are supplied with water through constant drops, a light trickling or a gentle mist spray. The soil is gently and evenly moistened without too much water evaporating, leaking or flowing away. The GARDENA Micro-Drip-System is flexible and easy to install thanks to the "Quick & Easy" – Simple Connection Technology. And used with a GARDENA Water Computer, everything is fully automatic – it couldn't be more convenient.

System overview

Dispensers for different applications

System start

System start
Pressure-reducing master unit and centralised fertiliser addition

Connection technology

Connection technology
Individual design encompassing patented Quick & Easy connection technology

Terrace / balcony

Plant pots
Terrace / balcony

Drip Heads
Precise drip irrigation at the root

Beds

Planted areas
Flowers / kitchen garden beds

Spray nozzles
Soft, fine-spray irrigation

Rows of plants
Hedges / sensitive edible crops

Drip pipes
Precise root irrigation for hedges and sensitive plants

GARDENA connection technology

The patented **Quick & Easy** connection technology ensures a durable, water-tight connection and enables the Micro-Drip-System to be quickly and easily installed and converted. The Micro-Drip-System can therefore be tailored to any garden or balcony. All system components, such as dippers, drip tubes and spray nozzles, can be combined using Micro-Drip-System connection technology.

TIPS AND TRICKS

The digital GARDENA Micro-Drip consultants www.gardena.com are on hand to help you plan the perfect Micro-Drip system for your garden.

Set

Micro-Drip-System Start Set Planted Areas

The GARDENA Micro-Drip system starter set for planting areas is used for convenient irrigation of flowerbeds and vegetable beds, and is ideal for short growing seasons in vegetable beds.

Rows of plants

Drip tubes for precise root irrigation for hedges and sensitive plants

Set

Micro-Drip-System Start Set Rows of Plants S

Set

Micro-Drip-System Start Set Rows of Plants M

The GARDENA Micro-Drip system starters sets for rows of plants are used for convenient and water-saving irrigation of rows

TIPS AND TRICKS

Save up to 70% water*

Using the Micro-Drip-System saves up to 70% water compared to conventional irrigation methods! Using this system offers a very gentle way of watering and prevents too much precious water from evaporating, draining away or flowing away unused. The plant roots receive just the right amount of water.

* Results from professional use; comparing drip irrigation to surface irrigation.

GARDENA Pipeline

Water like electricity from the mains.

Simply click your hose onto a water connector or water plug and you'll have water quickly wherever you need it. Whether in the flower bed, for a GARDENA Sprayer, for water-saving irrigation with the GARDENA Micro-Drip-System or for cleaning with the GARDENA Cleansystem. The GARDENA Pipeline is permanently installed underground and frost-proof thanks to automatic drain valves. You can say goodbye to long hoses in your garden.

1 Connecting Point
For water supply in the pipeline

GARDENA Water Computers

Automatic garden irrigation – for more free time.

30 years competence – Scheduled watering to give you more free time in the garden

Quality – Reliable valve technology “made in Germany”

Handling – Clear displays and intuitive operation

A model which makes irrigation easier is available for controlling a mobile sprinkler, a permanently installed Micro-Drip-System or your sprinkler system. A rain sensor or soil moisture sensor can be connected to all GARDENA Water Computers – for irrigation only if it is necessary.

Water Computer SelectControl

Including application-oriented programming recommendations

Rotary knob programming for 5 standard areas of the garden

Easy, fast, application-oriented operation

Detachable control panel

Comfortable handling

User-friendly LCD display

- All programmed settings can be viewed
- Clear layout

Options for connecting soil moisture sensors or rain sensors

- Save water - the watering system will not activate if the ground is damp or in the event of rain
- Based on your requirements - automatic „night” sensors with a soil moisture sensor

FOR MORE INFORMATION, SEE PAGE

144

Some models in the overview

Entry-level model with basic settings. Intuitive selection of irrigation data.

Flexible programming options. Days of the week can be selected as required.

Variable with two individually configurable outputs for two garden areas. Sensor-controlled irrigation with soil moisture sensor.

Extremely customisable via six watering programs. With scrolling text and menu navigation on a large LCD panel. Sensor-controlled irrigation with soil moisture sensor. Function for operation with Water Distributor automatic (art. 1197) for up to six garden areas.

DID YOU KNOW...

that GARDENA revolutionised garden irrigation as long ago as 1985 — with the world’s first Water Computer for private gardens. With continuous innovations for beginner gardeners and demanding garden owners, GARDENA continuously develops the models. This turns watering time into leisure time.

GARDENA Multi-Channel Controls

For automatic irrigation of larger systems.

GARDENA Multi-Channel Controls are particularly well suited when the water quantity of the tap is insufficient for operating the entire irrigation system at once, or when water requirements per garden area vary. Valves are integrated in the irrigation system that automatically open or close the water flow. The signal for this is provided by the GARDENA Multi-channel Control. GARDENA offers two different systems that allow automatic irrigation for your entire garden.

With power connection

Through the **irrigation control system** 1 mounted on a wall, the **valves** 2 directly receive the impulse via the cable for when to open or close the water flow. Up to 12 irrigation valves (garden area) can be fully automatically controlled.

Without power connection

Through a mobile **programming unit** 3 the **controllers** 4 can be programmed which are then mounted onto the **irrigation valve** 5 and, based on the entered data, open or close the water flow. Everything cable-free – with a battery – and any random number of garden areas can be controlled.

4 **Controller**

5 **Irrigation Valve 9 V**

TIPS AND TRICKS

Slugs and snails like moist conditions and are especially active in the evening. If you water in the evenings, you are getting the soil nice and wet and perfect for the snails. Therefore, it is best to water in the morning, because the water has seeped into the ground by the time the midday heat hits.

GARDENA Accessories

For addition to Multi-Channel Controls and Water Computers.

Thanks to the soil moisture sensor or rain sensor, the control recognises sufficient soil moisture or rain and then automatically stops irrigation. And with the Water Distributor automatic in combination with the Water Computer MasterControl, up to six garden areas can be irrigated one after the other.

FOR MORE
INFORMATION,
SEE PAGE

145

Soil Moisture Sensor

Interrupts or prevents automatic irrigation when soil is sufficiently moist. With multiple Water Computers, you can fully automate your watering system to react to soil moisture.

Rain Sensor electronic

Interrupts or prevents automatic irrigation at the onset of rain

Water Distributor automatic

For fully automatic control of up to 6 watering accessories (e.g. for flower boxes, lawns, potted plants, beds and hedges). All watering devices can be programmed to turn on one after another at set times using the Water Computer MasterControl.

TIPS AND TRICKS

You should also water your plants or your lawn even after it has rained, as rainfall is usually insufficient to provide plants with enough irrigation. Even if the ground surface appears wet, the water does not penetrate to the roots deep down in the soil.

GARDENA Pumps

Types of pumps at a glance.

GARDENA offers you and your customers an extensive range of pumps. With powerful, easy-to-use and reliable pumps for three different types of applications: garden irrigation, water supply and draining. From the basic Classic Pump to the high-quality Premium Pump in stainless steel design – you will find the right pump for every need. The overview below shows which pumps are available for which tasks.

Draining

Areas of use

- Pump water from the pool, pond or full excavation pit
- Pump water out of flooded cellars
- Pump water out of the laundry room
- Transfer water e.g. from a pond to a rain water tank

Requirements

- Powerful drainage performance
- Fast pumping out or transfer of water
- High delivery capacities

Your advantages

- Pump lots of water in a short time
- Prevent the worst water damages through automatic and fast pumping
- High functional safety

Product selection

- **Submersible Pumps**
For dirt particles of up to 5 mm diameter
- **Dirty Water Pumps**
For dirt particles of up to 38 mm diameter

Irrigation

Areas of use

- Irrigate with water from wells, cisterns and rain water tanks
- Increase water pressure of the tap

Requirements

- Pump with continuously high pressure for even irrigation
- Powerful, water pumping that is reliable on long term

Your advantages

- The right pump for every situation
- High-pressure and even garden irrigation
- Convenient and safe handling
- Spare resources – save drinking water

Product selection

- **Garden Pumps**
- **Electronic Pressure Pumps**
- **Rain Water Tank Pumps**
- **smart Pressure Pump**
- **Submersible Pressure Pumps**
- **Deep Well Pumps**

TIPS AND TRICKS

How do I find the right pump?
GARDENA is here to assist you in choosing the right pump and to provide comprehensive consultation.

Pump consultants can be found at:
www.gardena.com
service@gardena.com

Supplying Water for Domestic Use

Areas of use

- Water for the home (e.g. toilet flushing and washing machine) and for the garden from alternative water sources

Requirements

- Fully-automatic operating pump
- High safety and reliable use

Your advantages

- The home and garden are automatically and reliably supplied from alternative water reservoirs (e.g. cisterns, wells etc.)
- Spare resources: conveniently pump water, save drinking water, spare the environment

Product selection

• Electronic Pressure Pumps

For stationary and mobile use

• smart Pressure Pump

For stationary and mobile use

• Pressure Tank Units

For stationary use – permanently installed in the home

• Automatic Submersible Pressure Pumps

For stationary use (e.g. installed in cisterns)

The following are suitable for use with GARDENA pumps:

Mains water, rain water and pool water containing chlorine.

The following are unsuitable:

Salt water, aggressive and slightly flammable materials and foodstuff.

GARDENA Submersible Pumps and Dirty Water Pumps

For versatile use for pumping and transferring.

When clear or lightly dirty water needs to be pumped or transferred, GARDENA Submersible Pumps ensure easy draining. Also for other draining tasks and for flooded cellars, GARDENA Submersible Pumps are powerful and immediately ready to use. For draining an excavation pit or a pond, the GARDENA Dirty Water Pumps are ideal helpers. The powerful and robust GARDENA Dirty Water Pumps tackle particles of up to a diameter of 38 mm.

For tidy conditions

GARDENA Garden Pumps

Overview of pump types.

With the powerful GARDENA Garden Pumps, you can transport rain water from the cistern, rain water tank or well, and irrigate your lawn, flowers or vegetable garden while sparing the environment. From the starter model to the high-performance pump, with GARDENA you'll find the right pump for your requirements based on garden size, length of hose, number of sprinklers or desired pressure.

Robust and reliable

High-quality materials and meticulous design protect the pumps against damage and ensure a long life and secure operation.

Safe-pump function

- LED status display with warning function (fault)
- Automatic safety switch-off
- Integrated dry-running safety

Low-noise pump operation

Rubber feet guarantee a sturdy stand and low-noise and low-vibration operation.

GARDENA Electronic Pressure Pumps and Pressure Tank Units

For fully automatic distribution of water in the home and garden.

The GARDENA Electronic Pressure Pumps deliver constant, flowing water like from the tap. You pump water reliably e.g. from wells and cisterns. The compact design allows flexible and space-saving use. The GARDENA Pressure Tank Units make use of alternative water sources for automatic use of non-potable water in the home, e.g. for the toilet and washing machine. This reduces costs and spares the environment.

GARDENA Electrical and Battery products

Full power. Low noise.
Greater independence. Full flexibility.

Always ready to use, extremely flexible and environmentally friendly — electric and battery-powered garden equipment is becoming increasingly popular among amateur gardeners. From as early as 1973, GARDENA has been a pioneer leading the way for technological progress in the garden, and has worked continuously to develop its products ever since. Garden owners know the value of convenience and are now opting for Electrical and Battery products from GARDENA more and more often when choosing lawnmowers, trimmers, hedge trimmers, grass shears and shrub clippers.

One into many

A battery for multiple devices.

Lithium-ion batteries have revolutionised the way that energy is stored. They are small, compact and lightweight with a substantial energy density and a long life.

The biggest advantage is that you no longer need an individual battery for each device - one battery will work in a variety of devices. Simply replace the battery and get started.

One system battery — a wide range of possibilities

Li-ion
POWER SYSTEM **18V**

Pruner

Trimmer

Hedge Trimmers

Leaf Blower

The latest GARDENA Li-ion battery technology

- No memory effect, can be charged at any time as required
- Long battery life with consistently high performance

GARDENA POWER info indicator

- Clear charging status indicator with 3 LEDs
- Keeps you informed of the battery status at all times

GARDENA Battery Management System for increased safety

- High-tech electronics for full control of all battery processes
- Gentle but fast battery charging
- Even discharge with overload protection and deep discharge protection
- Safe storage without self-discharge

Lightweight and robust

- Low weight for optimum working comfort
- Resistant thanks to a particularly robust housing

30 % more power

- New high-capacity 2.6 Ah battery cells
- Up to 30% longer runtime

Set offers or individual devices

Step 1 for getting started with the GARDENA Battery System: Purchase a set containing a product, battery and charger (as a basic setup).

Step 2: Expand your own system with any device. No additional charger or additional battery are necessary.

Lawn Care

My garden. My oasis.

A beautiful, well-kept lawn is the heart of your garden – and mowing the lawn is the main task. Trimmers or edging shears are on hand for lawn edge care to provide the final finish between lawns and paths or beds. However, mowing alone will not result in a well-cared-for lawn: You should also consider aerating and fertilising at regular intervals.

The right mower for every lawn

GARDENA quality lawnmowers for every use.

A healthy lawn is a part of any beautiful garden. Lawn care and mowing are two of the most time-consuming tasks. Only frequent mowing ensures a lush and thriving lawn. With the right equipment, you can make mowing your lawn much quicker.

But what is the right mower? Which device will suit your needs? GARDENA offers a wide range of lawnmowers and cutting tools.

Considering the following points should help you to decide:

- The size of your lawn
- Environmental aspects
- Mulching, grass catcher or side discharge
- Cost-effectiveness/budget

GARDENA Robotic Lawnmowers

Over 20 years of experience*

- Different models to suit different lawn sizes and shapes, e.g. models for complex lawns or for uneven terrain with different gradients
- Extremely robust, long-lasting and quiet. Emission-free and therefore environmentally friendly
- For mowing and mulching at the same time: Fine blades of grass are left behind to fertilise the lawn
- High quality for long periods of operation and a high level of convenience

Let the mowing begin.

For manicured lawns, with more free time and convenience.

More on page 68

GARDENA Electric Lawnmowers

Available in electrical or battery-powered version

- Different models to suit different lawn sizes and requirements
- High quality, long-lasting, emission-free and therefore environmentally friendly
- Available as a mulching mower or with a grass catcher for collecting lawn cuttings
- Top-rated. Perfectly suited to all requirements, based on demand, power, cutting width and lawn size

Power to people who mow.

With a high-torque gear drive. For enjoyable and efficient lawn mowing with excellent results.

More on page 72

TIPS AND TRICKS

The most important decision you have to make regarding your lawn is surely the question: "Which lawnmower should I buy?" Because regular mowing ensures a lush, healthy lawn. Electric lawnmowers are a convenient solution for regular cutting, while perfect English lawns are achieved using cylinder lawnmowers. Without a doubt, the most convenient solution is certainly the robotic lawnmower.

You want to relax while the lawn is mowed.

You want to mow with maximum power.

You want an English lawn.

GARDENA Cylinder Lawnmowers

Electrical or battery-powered version

- A manual handheld mower for small lawns and electrical or battery-powered mower for larger lawns
- Emission-free and extremely quiet. The cylinder lawnmower can also be used as a manual mower if required
- Available as a mulching mower or with a grass catcher for collecting lawn cuttings
- A fair price and a top level of performance for tackling the toughest demands

Technology for English lawns.

High level of convenience and pure precision cutting.

More on page 76

Attachment for beautiful lawn edges

GARDENA Turbotrimmers

Electrical or battery-powered version

- For corners, path borders and flowerbed edges. The trimmer lets you mow those hard-to-reach places with ease.

Powerful cutting for longer lawn edges.

More on page 78

GARDENA Accu Grass Shears

- For shorter lawn edges. The battery-powered shears let you cut lawn edges with precision for a perfect cutting pattern.

Optimum shear handling.

Also suitable for shaping boxwood.

More on page 82

GARDENA

Robotic Lawnmower

For lawns up to 1,300 m².

This is lawn mowing today – totally relaxed.

With a GARDENA Robotic Lawnmower, sweat-inducing lawn care becomes relaxation. While you enjoy your free time, or unleash your creativity on your garden, the Robotic Lawnmower takes over the bothersome work all on its own. Lawn mowing has never been easier and more convenient.

We can now look back on more than 20 years of mowing experience, with plenty of large mowed areas and well-maintained lawns.

95% customer satisfaction speaks for itself:

The GARDENA robotic lawnmower is the most popular model for domestic gardens.

Fully automatic for a manicured lawn

Lawnmower SILENO+

Works quietly
60 dB(A) 60 dB(A),
so it will not bother you
or your neighbours

SensorCut system

The result counts – a stripe-free and uniform cutting result.

The GARDENA robotic lawnmower achieves this thanks to the SensorCut system. This special pattern of movement ensures that the lawn is always mown from different directions using the double-sided precision-ground blades — reliably and fully automatically up to an area of 1,300 m².

This principle of movement is based on almost 20 years of experience using reliable and high-quality robotic lawnmowers*.

* GARDENA is part of the Husqvarna Group, which introduced the first Robotic Lawnmower in 1995

Drives along the guide wire on its own to the charging station and recharges its battery

SensorCut system – for a uniform pattern of movement

Recognises obstacles thanks to collision sensors

Patented guide wire offers extended control options for more complex lawn areas and is used to return the robotic lawnmower to the charging station

Always clips the grass by only a few millimetres. The cuttings serve as a natural fertiliser

Through a Boundary Wire, knows where it can/must mow

Why buy a robotic lawnmower?

Dream lawn

Would you like to walk barefoot over a lusciously green, thick and healthy carpet of grass? It's relaxing. As robotic lawnmower pioneers, we have long-standing experience of mowing and our robotic lawnmowers have winning technical properties. Thanks to the SensorCut system, they mow regularly, sleekly and with "feeling".

Totally relaxed

The lawn is often the centrepiece of the garden. As soon as the robotic lawnmower takes over maintenance of the lawn, you are free from having to mow and you can sit back and relax. That's how easy it is.

Me time – you time

The garden is just the thing to help you wind down. It is a green island with space for the really important things in life. Straight away there will be time for family, friends and fun. Decide whether to spend your saved time in the garden or somewhere else. Time is not money, time is for living.

Relaxed life

You decide when to mow the lawn

The robotic lawnmower then works when you want it to

Simple menu navigation

Quick installation and operation

Extremely quiet

The quietest robotic lawnmowers on the market

Can be operated in any weather

The robotic lawnmowers can be used in any weather

More time

Fully automated mowing

The GARDENA robotic lawnmower works independently

Installed in an instant

Stripe-free and uniform mowing

Forget all about grass cuttings

The GARDENA robotic lawnmower cuts only the fine tips of the blades of grass on a daily basis

Beautiful lawn

SensorCut system

Stripe-free and uniform mowing.

Flexible cutting height

Easy-to-adjust cutting height

Precision cut

Thanks to precision-ground, double-sided blades

Mulch function

Natural lawn fertiliser

TIPS AND TRICKS

The robotic lawnmower can be used in bad weather and is extremely robust. Nevertheless: A garage protects it from direct sunlight and severe weather. Simply place it above the charging station! It is easy to reach the cable duct on the back, and if you want to activate the control panel, simply lift up the garage roof. (More detailed information on page 151)

Electric Lawnmower PowerMax™

High-performance and always ready to use

All PowerMax™ lawnmowers are driven by a Powerplus high-performance motor and ensure an excellent transmission ratio and cutting power. These powerhouses are the perfect mowers for every type of lawn. They can even mow long grass and grass that is still damp.

153

Features

i

PowerPlus motor

High-performance motor with high-torque gear drive for precise lawn cutting, even under the most challenging of conditions.

TIPS AND TRICKS

Lawns should not be cut in wet conditions, as the blades of grass clump together and cannot be trimmed cleanly. In addition, the lawnmower wheels can sink into the lawn when the soil is wet and therefore damage grass roots.

GARDENA Cylinder Lawnmowers

Especially suited for small lawn areas.
For a lawn like a golf course.

With a cylinder lawnmower, blades secured to a rotating cylinder do not touch the fixed bottom blade. This gives a very clean and gentle cut comparable with the cutting results of shears.

The result is a perfect lawn as smooth as a putting green.

Your advantages

- A perfect lawn
- Especially suited for small gardens e.g. front yards, allotment gardens
- Available as a hand lawnmower or in battery-powered and electric models
- Precise, clean cut
- Very quiet and easy to push

Ideal for small lawns

Lithium-ion rechargeable battery, can also be used without battery as a hand lawnmower

Up to 500 m²

Cylinder Lawnmover 380 EC
Electric, can also be used without power as a hand lawnmower

GARDENA Turbotrimmers

For difficult-to-access lawn areas and lawn edges.

A trimmer is very helpful wherever a lawnmower cannot reach. For example, because the space is too narrow, as between closely-standing shrubs. Also for lawn areas on steep inclines, the trimmer is ideal. Or for high grass in wild, uneven gardens with strong growth and weeds. The trimmer conveniently cuts grass and lawn edges with very little effort using a filament or plastic blade.

18 V Battery System

One System Battery – many possibilities

GARDENA Turbotrimmer is available as an electric model or as a battery-powered model for cable-free work. For this, GARDENA relies on modern and environmentally friendly technology for long and comfortable use of your trimmer. And best of all: The rechargeable batteries can be flexibly used and are suitable for other GARDENA battery-powered products as well.

Lithium-ion rechargeable battery technology

Lithium-ion rechargeable batteries are powerful and high-performance, reliable and without memory effect. They can be recharged at any time.

New!

All products are now also available without a battery - simply use a battery that you have already bought and get started!

Features

Tiltable trimmer head
For vertical trimming of overgrown lawn edges. The integrated guide wheel makes work especially easy and comfortable.

Trimmer head angle adjustment
With foot pedal for easy angling of the trimmer. Light, ergonomic work also under obstacles (e.g. trampoline, garden bench).

RotorCut cutting system
Durable plastic blade for an especially precise cut and efficient work. Easy to replace.

GARDENA Grass Shears

Ready to use at all times.

Grass shears ensure a perfect lawn. An even cutting height is part of a harmonious lawn impression – this includes lawn edges which a lawnmower often cannot reach. With grass shears or, even easier, with accu grass shears, you can shorten grass edges even in narrow areas, e.g. around ponds, beds and patios.

Comfort Grass Shears

For left-handed and right-handed people

Easy handling

Thanks to the comfortable handle with soft plastic components

Clean cut

With non-stick-coated, wave-ground cutting blade, special blade bearing for constantly powerful cutting across the entire blade length

Easy cutting

Special handle shape with optimal force application and best ergonomics in every situation

Comfortable work

For left-handed and right-handed people thanks to 360° rotatable cutting

Accu Grass Shears

Easy-to-use, light and manoeuvrable

TIPS AND TRICKS

GARDENA Telescopic Handle

Upright working when cutting lawn edges. Quick and easy assembly. Continuously adjustable to body height. More detailed information on pages 157

GARDENA Lawn Aerators and Lawn Rakes

Get rid of moss, weeds and thatch.

By aerating, meaning removing moss and weeds from the lawn, the lawn roots receive more space, air and water again. Through raking, the soil surface is loosened. The result is a lush and healthy garden.

For revitalising your lawn

Electric Lawn Rake EVC 1000

Handle can be taken apart
saves space for transport and storage

Through ergonomically shaped handle
Comfortable operation

High-power motor with high-torque gear drive for excellent results
Easy work

Large wheels with special tread
Safe and easy to push

FOR MORE INFORMATION, SEE PAGE

158

Some models in the overview

Scarifying

Electric Lawn Aerator EVC 1000

Intensive treatment for your lawn.
Recommended in spring and/or autumn.

Sharp, offset blades made of specially hardened, galvanised steel penetrate the ground by a few millimetres and remove thatch and dead grass from the soil.

Aerating

Electric Lawn Rake ES 500

Year-round care, can be carried out after each 2nd or 3rd mowing session.

Low-wear springs made of hardened stainless steel comb the lawn and gently remove moss and thatch. The springs can be easily and individually exchanged.

GARDENA Spreaders

For seeding and fertilising.

Over time, lawns lose important nutrients. Regular fertilising creates a balance. With the GARDENA Spreader, you dosage fertiliser, seed, or winter grit easily and precisely.

Year-round helper for spreading and dispensing

Comfort Spreader 800

Highly flexible scattering roller

Ensures exceptionally even distribution of material.

Stop system

The right amount, every time. Wheels have freewheel function when moving backwards. The material is only deployed when moving forwards. Overdosage is prevented.

Aluminium double handle with T-grip

Ensures stability and allows ergonomic adjustments of the dose using the adjustment lever

20 l capacity

Large areas can be seeded or fertilised in one go.

FOR MORE INFORMATION, SEE PAGE

158

Some models in the overview

Classic Spreader 300

The Classic

Comfort Spreader 500

Extra wide for time-saving spreading

Comfort Spreader 800

Extra wide and high for time-saving spreading

TIPS AND TRICKS

An aerator, lawn rake and spreader are also available as connecting tools for the GARDENA combisystem. Simply combine the connecting tool with the right handle. More on the GARDENA combisystem on page 108.

combisystem Vertical Cutter

For thorough removal of moss, weeds and thatch

combisystem Aerator Rake

For removing moss and thatch

combisystem Spreader

Can be used all year round e.g. for seeding and fertilising

GARDENA Special Tools

For care of your lawn.

For raking leaves, removing weeds, improving lawn edges or simply for gathering grass cuttings and garden debris: GARDENA products render lawn care easier. The special tools made from top quality materials are easy to use and efficient in application.

The right tool for every work

Weeding Trowel

Effortlessly remove weeds – without bending over and without dirtying hands

Mobile Garden Cart

For garden waste, grass clippings, weeds and sweepings

The Gripper

For gathering waste and refuse

FOR MORE INFORMATION, SEE PAGE

159

One handle for various attachments:

GARDENA combisystem Lawn Tools

combisystem Gather Rake

Frees the lawn from grass cuttings and leaves.

combisystem Plastic Fan Rake XXL vario

For large-scale and time-saving raking of grass cuttings, leaves etc.

combisystem Plastic Adjustable Rake

For fine and coarse raking material.

combisystem Lawn Edge Trimmer

For clean cutting of lawn edges.

New!

combisystem-Fruit Collector

The easy way to pick up windfalls and fruit of various sizes (approx. 4–9 cm) using just one tool.

TIPS AND TRICKS

Tackling the root of the problem

The weeding trowel enables you to easily remove weeds roots and all. To ensure that the hole in the soil quickly grows over, simply insert the trowel back into the ground and scrape the soil into the centre.

Easy functioning principle

Press into soil, turn 180° to the right
Pull out – finished
Easy removal through the press of a button

Trees, hedges, shrubs and flowers

My garden. My ideas.

Hedges and trees frame your garden. These living walls are an excellent way of partitioning land or creating visual accents in the garden. Supporting, pruning and cutting are not only essential to create the right appearance, they also have a significant impact on growth. Whether you are creating topiary, pruning or working at great heights, we offer practical solutions for every step that will make the tasks significantly easier.

GARDENA Axes

Precise and with optimal splitting power.

People have been using axes for centuries. While axes were used for a wide variety of purposes in the past, today society is returning to their original use. Axes and hatches are used for wood processing. GARDENA continuously develops garden tools and appliances, and offers an assortment of excellent axes and hatchets that enormously facilitate work with wood while being gentle on the body.

- Blade and axe head geometry tailored to the application
- Convincing design
- Clear line, slender, powerful shape
- Break-proof head-handle attachment
- Excellent ergonomics
- Premium workmanship and product quality
- Optimal variety – the right tool for everyone
- Ideal transport protection: Special packaging with

For strong and effective woodworking

Splitting Axe 2800S

Hammer function

For easy driving of plastic, wood and aluminium wedges. But caution: do not hit steel on steel

Break-proof, non-detachable head-handle attachment

- Long life
- High safety

Centre of gravity close to the axe head

- Optimal weight distribution
- Strong penetrating power
- Safe work

Soft components on handle

Comfortable grip, optimal ergonomics, absorbs vibrations, non-slip

Blade and head geometry adapted to wood working application

For an optimum splitting result

Hardened blades made from premium tool steel

- For a long life and high demands
- Special coating to split the wood cleanly, reduces friction

Stainless steel impact protection

- Protects the handle
- For a high level of work safety and durability

Glass-fibre reinforced plastic

Break-proof, very light, robust and durable

Safety note

Please only drive in steel wedges with hardwood or plastic hammers. Hammering steel on steel is dangerous and can lead to splinters.

New!

For dense trees

Comfort Pruning Lopper StarCut 160 BL
Max. reach 3,5 m

For high trees

Comfort Telescopic Pruning Lopper StarCut 410 BL
Max. reach 6,5 m

TIPS AND TRICKS

Autumn is the best time of year to prune fruit trees and shrubs and remove old, dead branches. This strengthens plants for overwintering and for better growth in the spring.

A man with grey hair and glasses, wearing a blue and white plaid shirt, is using a long-reach pruner to trim a tree branch. The pruner has a long, silver telescopic handle and a blue and orange cutting head. The tree is lush with green leaves, and the sun is shining brightly through the foliage in the upper right corner. The man is looking up at the branch he is about to cut.

GARDENA Pruners

Extremely easy to handle,
precise and lightweight.

GARDENA pruners enable you to reach treetops without needing a ladder.
Saw high branches easily and safely while standing on the ground.

Powerful sawing of tall trees without a ladder

Telescopic Accu Pruner TCS Li-18/20

Cutting stop

Supports cutting underneath branches and protects the chain when cutting close to the ground

Telescopic

For pruning and debranching trees and hard-to-reach vegetation up to a height of 4 m from a safe standing position on the ground

Tiltable cutting head

For easy cutting of any branches overhead and on the ground

18 V/2.6 Ah Li-Ion battery

- For powerful working and a long operating time
- POWER info charge state indicator

Power

- Makes up to 80 (Ø 8 cm) cuts on one battery charge

Also available without battery.

Features

Telescopic adjustment

For thinning and delimiting of trees and hard-to-reach woody plants from a secure position on the ground

Tiltable cutting head

For easy cutting of any branches overhead and on the ground

Cutting stop

Supports cutting underneath branches and protects the chain when cutting close to the ground.

TIPS AND TRICKS

GARDENA Turbotrimmer is available as an electrical model and as a battery-powered model for use without cables. GARDENA uses modern, environmentally friendly battery technologies for long and convenient use of your products.

And the best thing is that the batteries offer flexibility, as they are suitable for use in other GARDENA battery-operated products too.

GARDENA Saws

The powerful saw assortment.

Smaller branch diameters up to 45 mm are also easy to cut with pruning loppers; with this in mind, GARDENA offers a large selection of suitable tools. The saw takes over from a branch diameter of 45 mm upwards. It is specially designed for thicker branches and logs. Perfect your tree care by choosing the right saw.

For effortlessly sawing branches and logs

Gardeners' Folding Saw 200P

Lockable saw blade
For 3 different sawing angles depending on use

Extra soft components
Anti-slip working

Integrated hanger
For tidy and convenient storage of the saw

Hard-chrome-plated saw blade
For non-corrosive, continuous use

Precision cutting (Pull)
Impulse-hardened tooth tips with triple grinding on each saw tooth

Thumb hole
For easy opening and closing of saw blade

Stopper
Non-slip when pulling

FOR MORE INFORMATION, SEE PAGE

Some models in the overview

Bow Saw

Comfort Bow Saw 530

For bigger jobs, for thick branches and trunks, green and dry wood.

Gardeners' Folding Saw

Gardeners' Folding Saw 200P

The especially easy-to-use saw for all sawing work in the garden.

Gardeners' Saw

Gardeners' Saw 300P

The particularly smooth pulling cut is ideal for fresh and dry wood (trim saw).

TIPS AND TRICKS

Rule of thumb

1/3 of the saw blade length corresponds to the branch diameter that can be cut.

GARDENA combisystem

Cut, saw, pick fruit.

With the GARDENA combisystem, you can even reach tree crowns without a ladder. The telescopic handles and corresponding connecting tools can be flexibly exchanged. Simply connect the telescopic handle to the gardeners' saw, the bow saw or the fruit picker using the fastening screw and work in heights of up to five metres.

For working at a height: One handle, multiple attachments, many applications

Fruit Picker

The stainlesssteel blade makes it easier to cut stalks.

GARDENA Hedge Trimmers

Cut – tend – shape.

The ideal hedge trimmer is an important tool when hedges and shrubs need care and structure. Regular trimming is vital if hedges are to be healthy and dense. And if you'd like to shape your hedges, there are no limits to your imagination: Regardless whether you prefer a box- or trapezoid shape, or want to freely design: With the GARDENA Hedge Trimmers you always make the right choice – regardless for which task.

18 V Battery System

One System Battery - many possibilities

GARDENA Hedge Trimmers are available in electric or battery-powered models for cable-free work. GARDENA relies on modern and environmentally friendly battery technology for long and convenient use of your hedge trimmer. And best of all:

The batteries can be flexibly used, also for other GARDENA battery-powered products.

Lithium-ion rechargeable battery technology

Lithium-ion rechargeable batteries are powerful and highperformance, reliable and without memory effect. They can be recharged at any time.

New!

All products are now also available without a battery - simply use a battery that you have already bought and get started.

For more information, see page 62/63

Electric-/ Accu-Hedge Trimmers

PowerCut 700/65

New!

ErgoLine

Ergonomically designed handles, ideally-configured balance, for a comfortable and safe cut

Efficient 700 W motor

A faster, cleaner, more efficient uninterrupted cut, able to cope with difficult conditions

Impact protection

protects the blade when cutting close to the ground

Laser-cut precision blades

- durable and robust – a more precise, quicker and cleaner cut
- ProZone – Profi blades and special toothing

FOR MORE INFORMATION, SEE PAGE

163

Features

Ergoline

Ergonomically shaped handle and outstanding balance guarantee a comfortable and safe cut.

Impact protection

Protects the blades from kickback when cutting close to the ground

ProZone

Professional grinding and special teeth for effortless cutting of extra strong branches.

TIPS AND TRICKS

Do not cut your hedges in very cold conditions. The cold harms the plants: Branches are crushed and you cannot achieve a clean cut that heals well.

Rule of thumb for pruning hedges:

Spring cutting until mid-March; summer cutting until the end of July.

Electric-/ Accu Telescopic Hedge Trimmers

THS Li-18/42

Impact protection

protects the blade when cutting close to the ground

Tiltable head

For flexible working overhead or on the ground (for cutting hedges or groundcover)

TIPS AND TRICKS

Collection Bag Cut&Collect

New!

Great idea: Collect cuttings in a practical catching bag while you trim your hedges. This comes in handy when cutting the sides of hedges and hedges. Simply press on the catching bag and get started. You will be cutting, collecting and emptying in no time at all.

Fixed frame

guarantees stability and allows trimmings to be easily emptied/tipped out

Adjustable

Easily adjusts to various lengths of blades

A top-quality collection bag

for collecting trimmings flexibly and easily

Effective

Collects clippings as you cut the hedge

Flexible

Ideal for both the sides of hedges as well as the hedges

Convenient

Easy to empty/tip

GARDENA Accu Shrub Shears

Cut – tend – creatively shape smaller hedges and shrubs.

GARDENA Accu Shrub Shears are light, flexible and powerful. With their low weight, they are the perfect tool for trimming, shaping and pruning smaller hedges and ornamental trees and shrubs. Especially for filigree shaping of spirals, spheres and cones for boxwood, accu shrub shears are indispensable. Rapid changeover from shrub secateurs to grass clippers and vice versa by simply changing the blade.

ClassicCut

Versatile in use thanks to innovative blade change: for cutting grass, boxwood and shrubs. Comfortable to use and cable-free.

ComfortCut

Tilttable handle for enhanced ergonomics. Thanks to 18 cm long blade suitable for cutting smaller bushes and shrubs.

For cutting, shaping and trimming hedges and bushes

Accu Shrub Shears ComfortCut

FOR MORE INFORMATION, SEE PAGE

164

Features

Quality blade »Made in Germany«

Precisely ground and non-stick-coated for an ideal cutting performance and a long life.

Grass and Shrub Shears in one

Fast, easy and safe – the blade can be easily changed according to the individual application.

Tilttable comfort handle

Ensures – together with the integrated wheels – ergonomic and comfortable work.

TIPS AND TRICKS

GARDENA Teleskop Swivel Handle

For cutting lawn edges and ground cover plants in an upright position and more range for high hedges and side contours. Fast and easy assembly. Infinitely adjustable to body size.

GARDENA Hedge Clippers

Cut precisely.

Hedges and shrubs set accents in the garden. By choosing to shape or trim, the garden lover determines what size and shape hedges and shrubs are to have. With hedge clippers, you can precisely trim smaller hedges or single, large plants, or give an electrically trimmed hedge that final touch. A perfect hedge cut is a matter of the right tool.

Short- and straight-ground blades
For precise shaping.

Long, wave-ground blades or with special cutting edges
For large areas.

Gear transmission
Easy and tire-free cutting of thick branches.

Cut hedges and plants better, faster and with less effort

Boxwood Secateurs

GARDENA Secateurs

Good secateurs – full of power – healthy garden.

Precise cutting with GARDENA secateurs

Powerful secateurs are a real joy. Regular pruning makes hedges, shrubs and flowers fit. Remove wilted blooms, clip twigs that are in the way, cut back roses, bring plants into shape, thin out shrubs, prune fruit trees or finish fine cutting work: For every task, GARDENA has the right secateurs. With GARDENA Secateurs, you cut through thick and thin.

New!

Bypass

The double-edged secateurs are ideal for young, green plants, flowers, and green wood.

Anvil

The sturdy anvil is suitable for hard, dry wood, cuts branches for pruning and thereby prevents damage to bark.

Beds and soil

My garden. My project.

Regardless of whether you already have a remarkable garden or are planning a new project – soil cultivation is always your first task. Our various garden tools and system solutions are on hand to help you with virtually any task involving flowerbeds and vegetable patches. And with the right care it will take you no time at all to establish a beautiful and bountiful garden.

GARDENA Gloves Range

A well thought out range for every gardening job.

GARDENA Gardening Gloves for variable use in home and garden. Five different gloves with clearly defined properties and outstanding quality. Selected materials, high-quality workmanship and an attractive design for maximum protection, ultimate wearing comfort and the necessary sense of feel for gardening. All gloves are free of chromium – since no leather is used – and are thus very skin compatible.

The right glove for every situation

Planting and maintenance gloves

The lightweight glove for maintenance and planting tasks on balconies, terraces and in the garden.

Gardening and soil gloves

The tough glove for gardening and working in soil. Protects against moisture.

Water Gloves

The water-resistant pair for cleaning work in the garden and in the pond.

Tool Gloves

The robust glove for working safely and comfortably with garden tools.

Shrub-care Gloves

The special pair for cutting and working with shrubs and thorny plants.

Versatile:
For transplanting soil, sand, snow, gravel and other bulk materials.

GARDENA combisystem

One handle – various connecting tools –
multifarious applications.

Garden work requires the most various tools – for cultivating soil in vegetable and flower beds, for cleaning garden pathways or patios, for removal of leaves on the lawn or clearing of snow in winter.

Your advantages

Flexible

All connecting tools fit each
GARDENA Handle

Safe work

The large fastening screw guarantees a pull-
and twist-proof handle-tool connection

Over 80 devices can be combined.

1

2

3

4

5

The GARDENA combisystem offers everything you need for garden work. And best of all: You only need one combisystem handle and you can combine the connecting tools easily and randomly. Using the fastening screw.

1. Connect the selected tool to any handle and quickly change again when necessary.

2. Tighten the fastening screw. Finished!

5

**combisystem-
Extension Handle for
Hand Tools**

For extension of the
hand tools

TIPS AND TRICKS

In principle, the following applies:

Longer handles are preferable for pulling and pushing work, while a shorter one is better for chopping tasks.

GARDENA combisystem- Connecting Tools

Good tools for excellent results.

The first aim of soil cultivation is to keep the soil loose. Another important task is the removal of weeds. The fewer weeds grow, the more nutrients will reach the plant. In addition to this, there are also GARDENA Garden Tools for raking and sweeping, for cleaning, and for multifarious planting- and transplanting tasks.

Can be used all year round

For comfortable clearing of snow in larger areas

Snow Scoop

Effective distribution of winter spreading material

Small Caster

TIPS AND TRICKS

Gritting regulations

There must be no chance of slipping on pathways when there is a risk of black ice. However, it is prohibited to spread salt. Sand, sawdust or grit are significantly more friendly to the environment. Once the snow and ice have melted, grit can be easily swept away.

GARDENA combisystem Hand Tools

GARDENA Garden Vac and Blowers

Effortlessly removing leaves and debris.

When trees start to shed leaves, and dirt and grass cuttings accumulate in your garden, you need the perfect helper: the leaf vac and blower. This work used to be arduous and time-consuming, but it can now be done in no time at all. The leaf vac and blower combines blowing and vacuuming and is also ideal for shredding. Simply choose the function you need. Do you need to sweep up and collect leaves, dirt and grass cuttings and transport them in high volumes? Done! This helper vacuums garden waste and, if required, collects it all in a catching bag, reducing the volume of waste to be transported.

The right device for every application

Garden Vac/-Blower

Powerful leaf blower/vac with easy, tool-free switch from suction to blowing function. The ideal helper around the garden to keep it clean.

All-round Blower

Light and easy-to-use All-round Accu Blower. Ideal for quickly and effortlessly removing leaves and debris around the home and garage or in the garden.

GARDENA Oscillating Sprinklers

Sprinklers for rectangular areas

1					
		Oscillating Sprinkler	Classic Oscillating Sprinkler Polo 250	Comfort Aquazoom 250/2	Comfort Aquazoom 350/3¹
Area coverage**		9 – max. 216 m ²	110 – max. 250 m ²	25 – max. 250 m ²	28 – max. 350 m ²
Range is fully adjustable**		3 – max. 18 m	8 – max. 18 m	7 – max. 18 m	7 – max. 21 m
Sprinkling width**		3 – max. 12 m	Max. 14 m	3.5 – max. 14 m	4 – max. 17 m
Special features		16 precision nozzles made of soft plastic and water-flow regulation	Aluminium-reinforced nozzle for high breakage security, precision set row of nozzles for even irrigation, fine meshed stainless steel filter	Especially sturdy through wide foot, fine-mesh filter made of stainless steel	Fine adjustment of range and width of spray through flow control
Art. no.		8127	2083	1973	1977

** The operating pressure (bar) determines the irrigated area! The performance data was obtained with an operating pressure of 4 bar at the sprinkler.

Sprinklers for circular areas

1					
		Classic Spray Sprinkler Fox¹	Classic Circular Sprinkler Samba¹	Comfort Circular Sprinkler Vario	Classic 6 Pattern Sprinkler Boogie
Area coverage**		Max. 100 m ²	9 – max. 250 m ²	Max. 225 m ²	11 – max. 100 m ²
Range of spray**		Ø max. 11 m	Ø 3 – max. 18 m	Ø max. 17 m	Circle: Ø max. 10 m / semi-circle: r = max. 8 m / square: max. 8 x 8 m / rectangle: max. 16 x 2 m / ellipse: max. 3 x 5 m / point spray: 1.5 m
Special features		With spike	Precision nozzles, with sturdy base and metal spikes for stable use, includes dirt filter	Irrigation sector adjustable in seven levels from 90° to 360°	Sprinkler with six different spray patterns (full circle, half circle, square, rectangle, ellipse, jet)
Art. no.		1951	2060	1949	2073

Sprinklers for large areas

Comfort Turbo-Drive Sprinkler¹

Premium Full or Part Circle Pulse Sprinkler

Area coverage*	75 – max. 450 m ²	75 – max. 490 m ²
Sector distribution	20°–360°	25°–360°
Adjustment of range*	5 – max. 12 m	5 – max. 12.5 m
Special features	Quiet as a whisper. Even water distribution through 2-zone irrigation, equipped with spike	Robust metal-plastic design, high-precision brass nozzle, equipped with spike
Art. no.	8144	8136

Sprinklers for beds, borders and plants rows

Sprinkler Hose

Soaker Hose

Use	Fine spray for beds, borders and narrow areas	Targeted, water-sparing irrigation of planting rows
Length	7.5 metres, can be randomly extended or shortened (max. length 22.5 m)	7.5 metres, can be randomly extended or shortened (max. length 30 m)
Special features	Equipped ready for connection	With valve for adjusting flow rate and pressure
Art. no.	995	1968

GARDENA Cleansystem

GARDENA Handles

1 Running Water Handle

Running Water Handle

2 Telescopic Running Water Handle

Running Water Handle, adjustable in steps

3 Running Water Handle Extension with Joint

Finely adjustable elbow joint for cleaning difficult-to-access areas, for example mobile home roofs or conservatories

Handle length	90 cm / 150 cm	155–260 cm	53 cm
Art. no.	5552 / 5550	5554	5556

GARDENA Cleaning Accessories

					
	Wash brush	Window Cleaner with Wiper	Hand Held Wash Brush	Scrubbing Brush with Elbow Joint	Hand Held Scrubbing Brush
Use	Gentle and effective cleaning of sensitive surfaces, e.g. of cars or caravans	For thorough, effective cleaning of glass surfaces	Gentle and effective cleaning of sensitive surfaces, e.g. of garden furniture or garage doors	Thorough cleaning of robust floor areas, e.g. patios or stairs	Thorough cleaning of robust surface areas, e.g. of garden tools or rubbish bins
	Fully rotatable in 30° steps	Can be used with a handle or as a hand-held appliance	Can be used with shampoo wax sticks	Flexible in use through 360° swivel joint	For cleaning narrow spots thanks to elastic and flat brush body
	High-quality PET bristles	Flexible in use through 360° swivel joint	Infinitely adjustable, lockable flow control	Practical triangular shape for cleaning narrow spots and corners	Can be used with shampoo wax sticks
Art. no.	5570	5564	5574	5562	988

Offers

				
	Car Cleaning Set Wash brush, running water handle, shampoo	Floor Cleaning Set Comfort scrubbing brush, running water handle, shampoo	Shampoo For effective cleaning of painted and plastic surfaces. Biodegradable	Shampoo Wax Sticks For cleaning paint and plastic surfaces. Biodegradable

18 V Battery System

One system battery — many possibilities

GARDENA 18-V products are available as a battery-powered model with battery included, but also **without a battery**. Simply insert an existing system battery from a previously purchased product. GARDENA uses modern, environmentally friendly battery technologies for long and convenient use. And the best thing is that the batteries offer flexibility, as they are suitable for use in other GARDENA battery-operated products too.

Lithium-ion battery technology

Lithium-ion batteries are powerful and provide a strong output. They are reliable and not subject to memory effect. They can be recharged at any time.

New! All products are now also available without a battery — simply use a battery that you have already bought and get started!

GARDENA Service

Always on the safe side.

Detailed information on our products can be found on our website www.gardena.com. You'll also find comprehensive planning assistance for irrigation control systems, pumps or ponds that render your product selection easier. Should you have more questions on our products, accessories or spare parts, our qualified GARDENA Service will be pleased to help you.

And for the rare case that your GARDENA product should need a repair or maintenance, we've thought ahead and can offer you an extensive range of services. Our technical support service will be glad to assist you with questions or problems. If you are unable to repair the product yourself, our central repair service will take it over. For this purpose, we also have a pick-up service and product exchange service.

With GARDENA you're always on the safe side.

You can reach our GARDENA Service as follows:
